GrGr08

Film type

Shade Film | Article No. SF1570

8%	100%	18%	0.57
Visible light transmission	UV rejection	Total solar Reflection	SHGC / g-value[1]

Description and Application

GrGr08 provides effective glare protection while preserving excellent outward visibility. Its subtle gray tone and low visible reflection create a clear, natural view and allow the shading system to blend discreetly into the surrounding architecture.

GrGr08 is available in embossed and pleated versions for enhanced stability and an elegant appearance. For specialist applications such as air traffic control towers (ATCTs), it can also be supplied non-embossed to provide an especially clear and undistorted view. Further applications include museums, listed buildings, waterway control towers and ship bridges.

FEATURES

Application	Indoor blinds
Color outside/inside	gray/gray
SC – Shading Coefficient[1]	0.66
Colour Rendering Index	73

[1] Calculated according to ISO 52022-3 using 4 mm single glazing.
