

Full spectrum solutions without compromise

WHY RHODETEC

Because smart solar protection is about more than just shade. Our high-performance shade films and systems combine design, comfort, and energy efficiency – perfect for modern architecture and sustainable building.

YOUR BENEFITS AT A GLANCE

- ✓ Heat Protection
- ✓ Glare Protection
- ✓ Natural Daylight
- ✓ Clear View
- ✓ Less AC / Energy Saving
- ✓ UV- Protection

OUR SOLUTIONS ARE IDEAL FOR ...

-  Energy-efficient upgrades for commercial buildings
-  Comfortable indoor climate at home
-  Invisible protection for monuments and museums
-  Sustainable daylight and heat management in modern architecture

SUPPORT FOR SUSTAINABLE BUILDING – LEED-READY

RHODETEC shade films and systems can actively contribute to LEED certification by improving energy performance and enhancing occupant comfort.

Our films support key LEED criteria in areas such as:

- Thermal comfort (indoor climate optimization)
- Daylight utilization (natural light without heat)
- Energy efficiency (reduced cooling loads)
- UV protection (material preservation)

Let RHODETEC help you achieve your sustainability goals – smarter shading for greener buildings.
