EMI-SHIELDING FILM

DESCRIPTION

Every minute more devices are connected to the internet and every day more and more data is transferred electronically. This makes the protection of this data against data theft and hacking increasingly important. At the same time, employees and sensitive devices should be protected from electromagnetic radiation as best as possible. The S26 ro film is used to protect against data theft and to shield electromagnetic radiation in the frequency range from 10 MHz to 4 GHz.

FEATURES

≥ 26 dB 10 MHz to 4 GHz

Shielding effectiveness Frequency range

16% $\geq 99\%$ Visible light transmission UV-rejection

85% Exterior Total solar energy rejection (TSER) Application

65% 14% 63% 23%

Visible light reflectance Total solar transmission Total solar reflectance Total solar absorption

INTENDED USE

The S26 ro offers a very high electromagnetic shielding effect for protection against eavesdropping, data theft/hacking and for security and defence purposes. defence purposes. At the same time, it effectively protects against solar radiation and heat.
