

Selective 75 so

Film Type

SUN PROTECTION FILM

DESCRIPTION

Selective so film is a spectrally selective window film and combines high light transmission with high rejection of solar energy. The film is durable and due to its special properties edge sealing is not necessary.

Total solar transmission

≥99%

UV-rejection

INTENDED USE

Perfect for offices and other commercial buildings where high energy savings with the highest possible daylight penetration is required. Since the films are almost invisible, there is no detriment to the appearance and architectural impact of the building.

Tested on single glazing (3 mm). All technical values are manufacturer information. Production-related fluctuations and changes are reserved.
